

Important News and Updates!

Adrian, thank you for taking the time to read our April 2023 Newsletter! We have some exciting updates to share with you, so read on to find out more...

We are exhibiting!

10-13 OCTOBER 2023
MESSE MUNCHEN EXHIBITION CENTER
MUNICH, GERMANY
STAND B5-1316

SEE YOU THERE!

New Products

The ALS DTS LED Uni-Directional Elevated Light

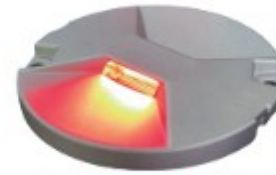

The range includes multiple options such as Center Line, Crossbar, and Side Row for Approach Lighting, and Stop Bar and Threshold End applications. These lights are sleek and compact, without compromising safety. In fact, the standard light comes equipped with self-learning fail-open technology for extra protection.

LED Aircraft Stand Manoeuvring Guidance Lights (Apron)

Introducing the ALS DTS LED Inset Aircraft Stand Manoeuvring Lights, a new addition to Airfield Ground Lighting. These lights are designed for apron applications, utilising super bright LED technology for low maintenance operation and reduced running costs. There are three models in the range.

Important News

Pathfinder Control System

With remote control capability, the Pathfinder system ensures safe and efficient manoeuvring of ground traffic on the airfield, while its monitoring system stores alarms for future analysis. Trusted by over 300 airports globally, the Pathfinder ALCMS system is a reliable and efficient solution for airport lighting control and monitoring.

Vista Lighting System

This system features a lightweight and durable aluminium body, a scratch-resistant and UV-protected optical diffuser made of polycarbonate, and a three-step light dimming option. With up to 90% lower power consumption compared to traditional systems, the VISTA System offers extended operating hours and almost zero maintenance while still delivering equivalent or better lighting characteristics. The VISTA System is flexible, easy to install, and weatherproof, making it suitable for various conditions.

Transitioning from Fluorescent to LED

Recently, the Department for Environment Food and Rural Affairs have updated their restrictions regarding the use of Fluorescent Lamps. The update shows which exemptions have been renewed or revoked, as well as their expiry dates.

This update only applies to those in England, Scotland and Wales.

Projects

ALS has recently completed an airfield lighting control system upgrade at Leeds Bradford International Airport. The upgrade saw 18 MCR400 Constant Current Regulators installed, providing more versatility and control options for the various lighting circuits on the airfield.

Kruger Mpumalanga International Airport in South Africa has installed 20 MCR400 Constant Current Regulators from ALS. We have a reputation for providing full training programs and close working relationships with airports, and Kruger is the latest to benefit from our airfield lighting solutions.
